

NEW GPTZero Feature

NEW IN BETA

Request Edits

In select classrooms, reviewers can request edits from writers to add their authentic contributions and write in a controlled environment

Request Edits

Allows authors to focus on editing AI text in a supervised environment.

Writing Sandbox

Monitor copy-pastes and receive a report on writing improvements.

Video Highlights

Watch a video replaying moments of human writing.

Receive exclusive early access to GPTZero's newest feature - Request Edits.

Once AI is detected in writing, what do you do? GPTZero is first to market in the next step in AI detection. Request Edits allows writers to revise their AI text to input their own unique human contributions.

Teachers worry about AI's impact on student mental health

Recent EdWeek Research Center surveys found that more than two-thirds of teachers and school district leaders expect that AI will have a negative impact on teens' mental health over the next decade.

Navigating AI in the classroom

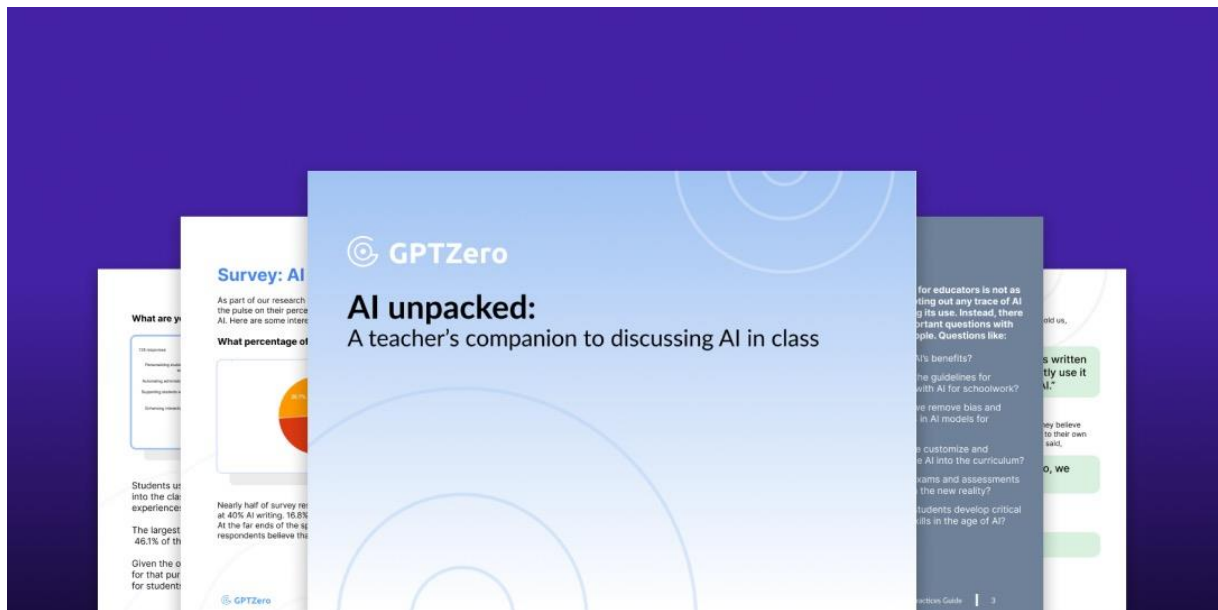

What do you do if AI is detected in your classroom?

If you detect AI writing in a student's work, it's important to default to the stance of educating and raising awareness of AI's benefits and hallucinations. You are here to teach, both your curriculum but also how students will move forward through the world. So in that light, start the conversation from a place of good faith. Your approach should acknowledge the potential of AI as a tool, while underscoring academic integrity and the development of personal voice and critical thinking.

7 steps to implementing a policy on AI use at your school

We surveyed over 100 educators on whether “Your school/educational institution has a clear, well-understood policy on AI use.” A resounding 32.1% “strongly disagreed.”

If you find yourself identifying with that group, there’s work to be done bridging the gap on your campus’s AI policy. Here are some key first steps to championing a clear policy on AI use at your school/educational institution.

Why educators should embrace AI

How AI will affect learning is a hot topic that some educators view with fear, suspicion, and panic. In fact, many schools have completely barred machine learning from classrooms when they should be harnessing its power and embracing it instead.
